all Meridian product

We always provide the latest designs of our products, focusing on ergonomics, technology, and the quality of materials for our loyal customers. To create personal satisfaction in your daily routine.

## ABOUT COMPANY

We play an active role in the development of bathroom interior design, particularly by highlighting innovations of the latest models. We strive to provide innovation and convenience as our top priorities to achieve customer satisfaction.

MERIDIAN was established in 1997 and entered the emerging domestic sanitary ware market with the MERIDIAN brand. We developed acrylic bathtubs using high-quality materials from Lucite International Corporation Technology, and today our factory stands proudly in the heart of Jakarta, within Indonesia's property and building material industry.

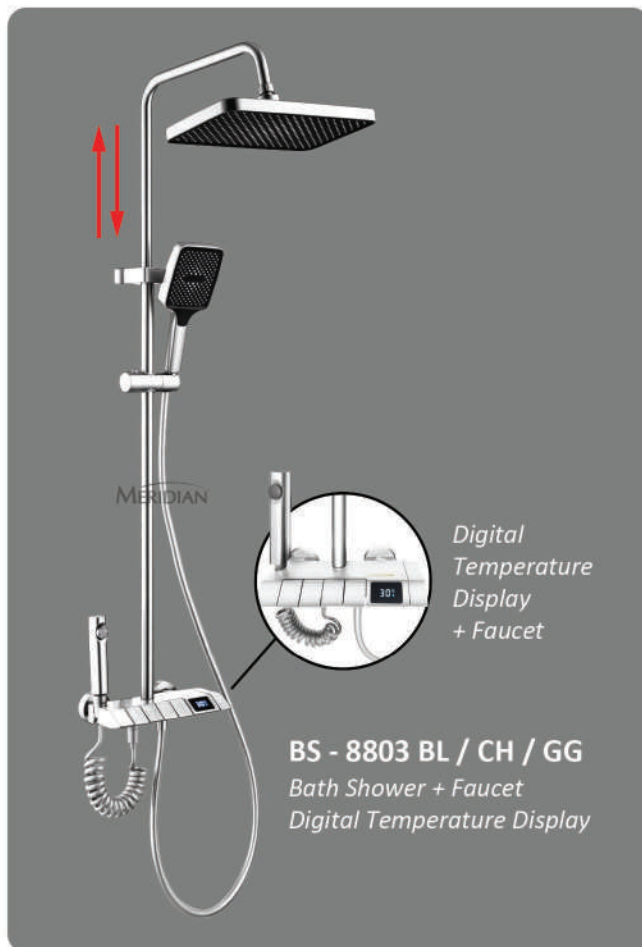

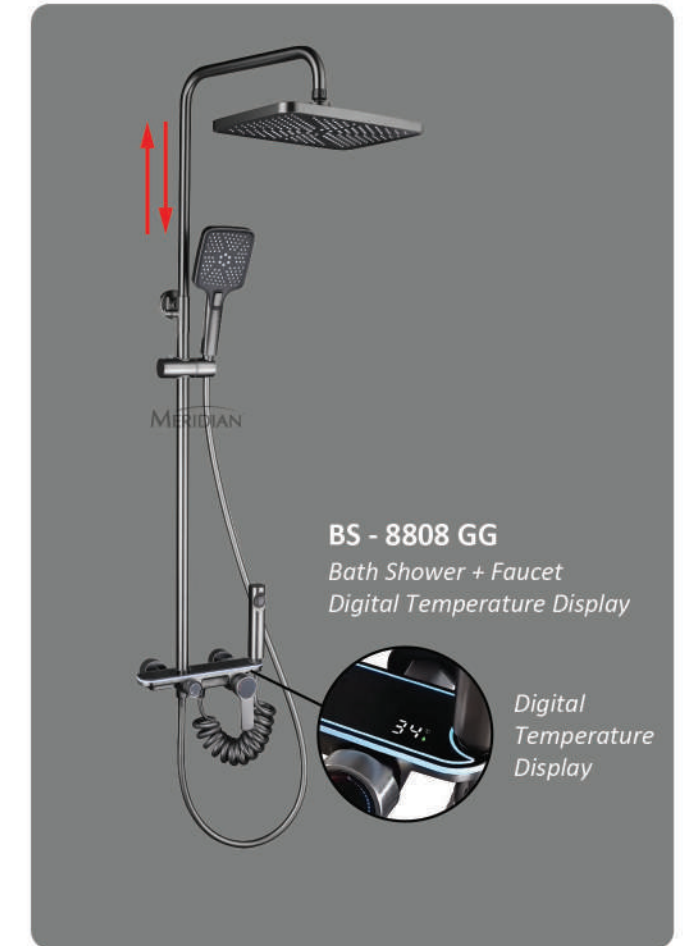

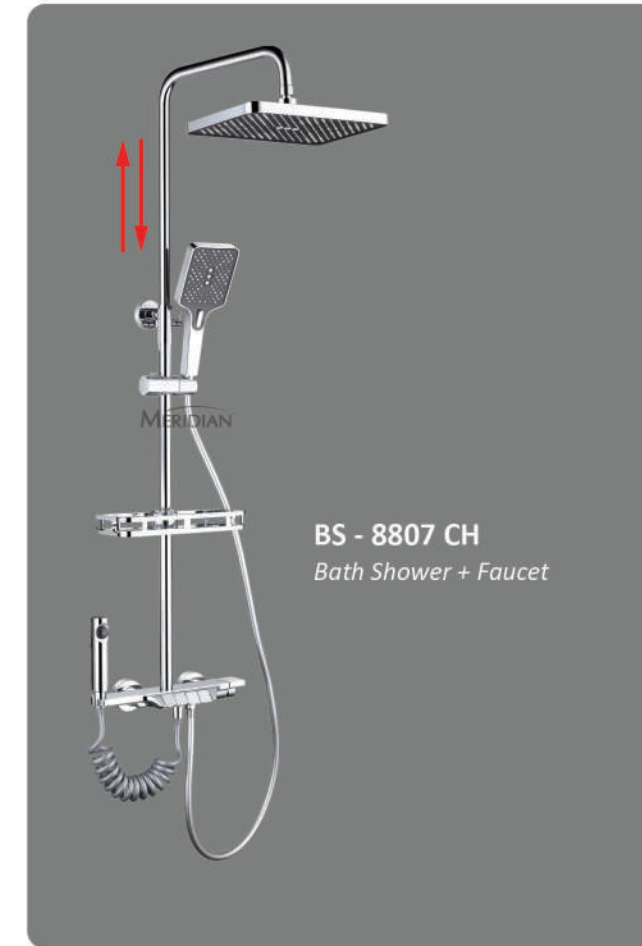

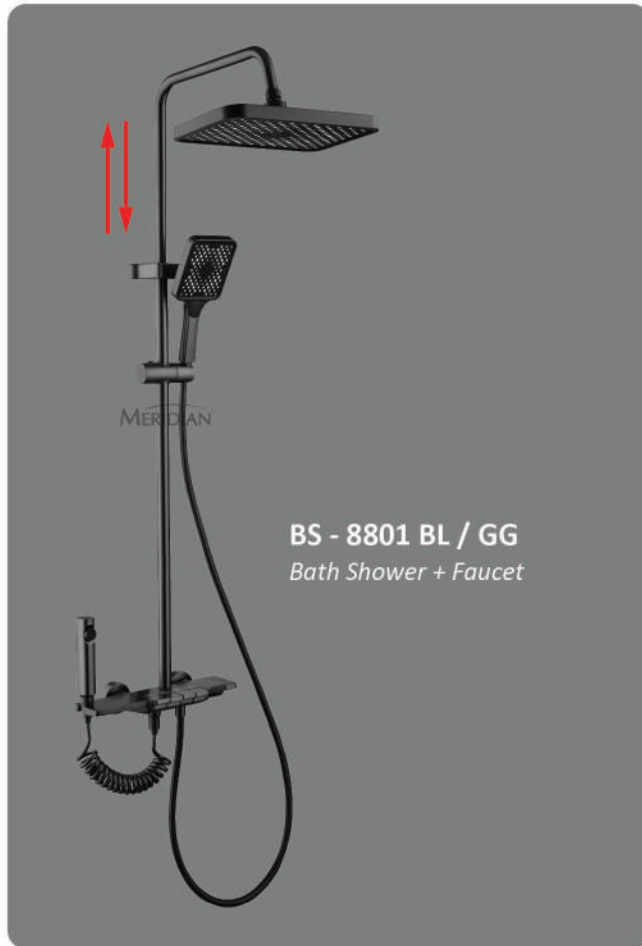

In 2003, MERIDIAN expanded its production and established a second production line for sanitary products, such as bathtubs, washbasins, toilet bowls, and kitchen sinks made of cultured marble. Around the same time, we achieved a breakthrough in material development. We collaborated using Japanese technology to thoroughly mix layered acrylic, cultured marble, and reinforced fiberglass to produce acrylic onyx, a new material that offers easy maintenance.

By 2007, we began importing sanitary ware from China to combine with our own manufactured products such as ceramic toilets and basins, shower screens, glass basins, faucets, bathroom accessories, fittings, LED mirrors, aluminium doors, MDF & WPC doors, steel doors, and many other new products, completing our mission as a Meridian home builder company.

MERIDIAN's all-encompassing services now reach all provinces of Indonesia, where we currently provide for a wide range of customers, from private homes to hotels and resorts. MERIDIAN will continue its pursuit of perfection in both product quality and service.

## • INDEX

**BATHTUB INSTALLATION** (Pemasangan Bathtub)

- Siapkan lubang pembuangan di bawah area bathtub.
- lakukan water proofing pada area lantai yang akan dipasang bathtub.
- Buatkan dudukan bathtub dari bata/semen dengan ketinggian  $\pm 15$  cm dari lantai ( disesuaikan dengan type bathtub ) daerah dekat avur dikosongkan untuk memudahkan penyambungan avur.
- Pasangkan avur pada bathtub, bagian dasar avur perlu disekalant dengan silicon. Pasangkan bata pada ujung dalam atau satu sisi dalam bathtub sebagai tunjangan. Letakkan bathtub pada dudukan yang telah dibuat, sambungkan avur dengan saluran pembuangan menggunakan pipa atau selang fleksible 1 1/4".
- Pastikan setiap sudut bathtub sama tinggi menggunakan waterpass.
  - 3 titik untuk bathtub corner (▲)
  - 4 titik untuk bathtub long (■)
- Lakukan tes kebocoran dengan mengisi air dalam bathtub & lakukan pembuangan air beberapa kali untuk memastikan tidak ada kebocoran.
- Apabila bathtub tidak ada bumper, pasang bata di sekeliling sisi bathtub dan apabila terdiri dari bumper terpisah, maka di bagian depan bathtub perlu diangkat sedikit untuk memastikan bumpernya.
- Rapihkan celah antara bathtub dengan dinding lantai dengan menggunakan semen putih / warna / silikon
- Dilarang** mengisi pasir di sekeliling bathtub, karena dapat menjadi sarang serangga ( semut dll ) & jika terjadi kebocoran sulit mencari sumber kebocoran.

**Sistem Pembuangan Sifonik**

Sistem pembuangan sifonik adalah sistem pembuangan dengan metode seperti pusaran air, yaitu "menarik" material keluar dari bowl toilet. Sementara air memasuki bowl dari tangki melalui jet dan rim dengan "mendorong" material keluar. Ini secara bersamaan mendorong dan menarik material sepenuhnya.

**Sistem Pembuangan Wash Down**

Sistem pembuangan wash down adalah sistem pembuangan dengan metode menuangkan air dari tangki ke dalam bowl toilet lalu "mendorong" material ke bawah outlet. Sistem pembuangannya hanya "mendorong" saja, tidak disertai dengan "pusaran & tarikan"

Fixed Window + Mosquito Net  
( 60 x 40cm )  
5mm Ordinary  
Frosted Glass

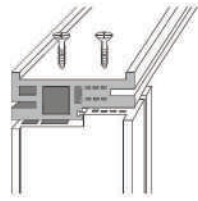

1.) Siapkan lubang dinding

Ukuran : 90 x 214cm  
: 80 x 214cm

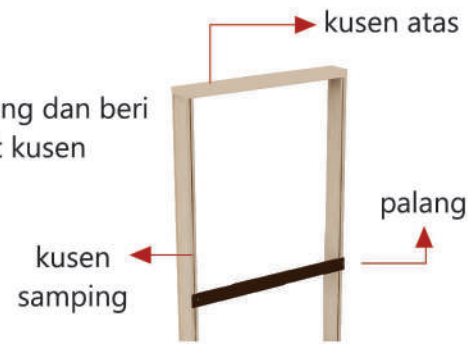

Toleransi lubang dinding (lebar/tinggi) maksimal antara 0,5 ~ 1 cm lebih besar dari ukuran kusen.

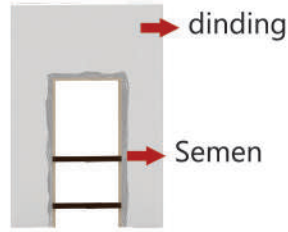

2.) Sambungkan kusen bagian atas dengan kusen bagian samping dengan cara dibaut dari kusen bagian atas seperti gambar disamping

3.) Pasang palang dan beri paku di got kusen

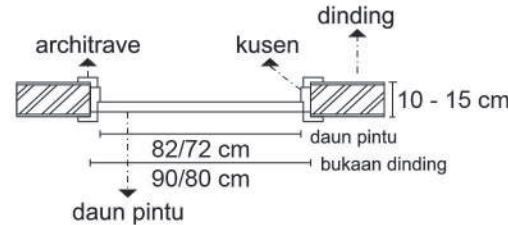

4.) Pasang rangka kusen ke dinding menggunakan baut dan fisher lalu isi celah kusen dengan semen atau dengan PU foam.

5.) Bongkar palang lalu pasang architraf ke dinding menggunakan lem kuning

6.) Tampak atas setelah kusen dan daun pintu telah terpasang

STEEL DOOR INSTALLATION METHOD ( Metode Pemasangan Pintu Baja )

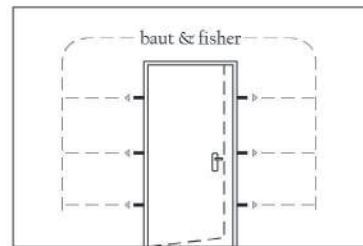

1.) Siapkan lubang pintu sesuai dengan ukuran kusen pintu dalam (in), lalu plester dan aci dengan rapih sebelum pintu dipasang ke kusen.

2.) Toleransi lubang pintu (lebar/tinggi) maksimal antara 0,5 ~ 1 cm lebih besar dari ukuran kusen dalam (in).

3.) Pintu dan kusen pintu telah dirakit rapih dari pabrik. Lalu masukkan pintu & kusen ke dalam lubang pintu.

4.) Gunakan alat waterpas agar pintu dan kusen terpasang rata.

5.) Gunakan baut dan fisher yang telah di sediakan untuk mengikat kusen kanan dan kiri ke dinding.

6.) Gunakan semen nut atau lem silicon utk menutup celah antara kusen & dinding.

7.) Pasang handle pintu.

1. Bathub *anti noda* permanent tanpa bahan kimia.
2. Bathub tidak menggelembung / benjol direndam air.
3. Permukaan bathub sangat halus dan mengkilap.
4. Acrylic tidak berubah warna dan juga tidak retak rambut.
5. Bathub **MERIDIAN** ringan dan kuat dengan perawatan yang mudah.
6. Desain eksklusif dan terbaru dengan kualitas *Acrylic Lucite International*.

**Garansi 3 tahun**  
( tidak bisulan / benjol , retak rambut, berubah warna , anti noda )

Perbandingan Bahan Baku

Keterangan	Acrylic / Acrylic Onyx	Gelcoat Fiber	Marble / Onyx / Granite	Steel
Bahan Baku Finishing ( Surface material )	Acrylic Sheet	Cat Semprot	Cat Semprot	Cat bakar
Tebal lapisan warna	3 mm	0,3 mm	0,3 mm	0,3 mm
Bahan penguat ( Reinforcement )	Onyx+breglass	breglass	Resin+Tepung	Plat Besi
Ketebalan total dinding bathub	6-8 mm	3-5 mm	12-15 mm	1-2 mm
